Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a browser method, classified in class 705, subclass 26.
- II. Claims 11-20, drawn to a browser device, classified in class 709, subclass 223.
- III. Claims 21-30, drawn to a storage medium, classified in class 369, subclass 280.
- IV. Claims 31-33, drawn to a networked system, classified in class 713, subclass 351.
- V. Claims 34-36, drawn to a nodal network, classified in class 370, subclass 254.

The inventions are distinct, each from the other because:

Inventions I-V and V-I, respectively are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I-V each has a separate use relative to the others in the application of data intercept. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3627

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
